

Apta Cash Guardianship

**An Entire Team Guarding Our
Members' Health & Wealth.**

Apta Guardianship **changes everything**. It means fewer missed diagnoses, faster treatment, and a trusted physician in your corner. Members experience better health, with less hassle. Employers see real savings through smarter care and cash negotiations. It's what healthcare should be: personal, proactive, and protective.

How It's Different

Apta Guardianship is more than just care; it's a committed partnership between physician and member. With a deep understanding of each individual's health history, Apta physicians act as vigilant guardians, identifying risks before they become problems. This proactive, personalized approach drives better health outcomes, reduces costly interventions, and minimizes out-of-pocket expenses. It's how we turn everyday care into lifelong protection.

**Guardians handle up to
95% of all care needs**

**Appointments typically average
about 30 - 45 minutes**

**Save up to 200% by paying
cash for medical procedures**

As part of the Apta Guardianship program, a concierge team negotiates lower cash prices for medical procedures on behalf of members when their Guardian physician recommends a specialist, ensuring they pay less without hidden fees or surprise bills.

Why Guardianship Matters

- **Truly personal:** Members receive guidance tailored to their health needs.
- **Better outcomes:** Quick, informed decisions lead to faster recovery and fewer unnecessary treatments.
- **Cost control:** Employers and employees save by eliminating inefficiencies in traditional insurance by paying cash.

Apta Guardianship improves outcomes, cuts bottom-line spending and sets a new benchmark of what healthcare should be.
